

RETRO-REFLECTIVE MARKERS

Taxiway Edge Markers

ANS 214

Description

The Retro-reflective Taxiway Marker is used to delineate taxiway and apron edges when no edge lighting is provided or when centerline taxiway inset lighting is used. The marker is available in different colors to suit standard or special applications.

The Retro-Reflective Taxiway Marker is compliant to TC TP312 Rev 5 section 5.5

Features

- The ANS 214 Retro-reflective Marker is constructed of impact resistant plastic and features a built-in frangible coupling that will allow the marker to come apart when impacted by an aircraft or vehicle but will withstand the effects of jet blast.
- The marker uses a very high-grade Reflexite retro-reflective material meeting or exceeding the requirements of ASTM D4956-95.
- The marker is available in three standard sizes but can be custom made to any customer required size and length
- Mounting can be accomplished by:
 1. 2" ANS Angle Mounting Stake, 36',60" nominal length
 2. 2" Aluminum Mounting Flange

Options

Reflective Color

- B = Blue
- Y = Yellow
- C = White
- R = Red
- G = Green

Length of Reflective Area

- 1 = 355 mm (Standard)
- 2 = 475 mm
- 3 = 850 mm
- C = Custom
